You are looking for a high-quality system for treating your cells.
MyCELLS PRP® has passed stringent quality tests performed by Harlan Biotech Ltd and by BSL Bioservice, Laboratories GmbH.
All the tests were performed according to the protocols established within the European Reference Standards or the official guidelines, recognized at European level (Official Pharmacopoeia), and complying with the stringent requirements for obtaining FDA approval.

For any further information please contact your doctor.

MYCELLS

Cell Regeneration for the treatment of cartilage, tendon, ligament and muscle disorders

Your own cells for tissue regeneration

Cell Regeneration for the treatment of cartilage, tendon, ligament and muscle disorders

Mycells PRP® - Platelet-rich plasma - the natural and safe solution for joint, tendon and muscle problems.
Biological Cell Regeneration is the most innovative and safest treatment that speeds healing and relieves pain without the risks of side effects specific to more aggressive therapies.
Your stimulated cells release growth factors, attract stem cells, and initiate the regeneration and the healing of the lesions, resulting in powerful pain relief and improved mobility.

With **Mycells PRP®** you can treat:

Arthrosis and cartilage degeneration

Chondral, meniscal, muscle lesions, strains, sprains

Tendinopathy

Fasciitis

Rotator Cuff injuries

Many professional athletes have proven the efficacy and safety of infiltrative treatment with PRP.

Today, with MyCells PRP® you can do it too.

The MyCells PRP® treatment, used in combination with other treatments, amplifies the effects and the duration in time.
